VALUES

- **Quality and Service:**

We emphasize quality over quantity in our delivery of services and in long-term investments of equipment and facilities.

- **Community Development:**

We aid in community development through support of high profile events in our parks and by advocating for continued improvements in parklands and facilities realizing that public perceptions of our community are strongly influenced by these efforts.

- **Inclusion:**

We believe that public recreation programs and parks should be open and welcoming to all people regardless of race, religion, age, gender, socioeconomic status, or ability.

- **Preservation:**

We make a concerted effort to maintain a balance of natural and developed areas within the city park system.
